

# FIRST & ONLY 27kV Polymer Cutout<sup>🇨🇦</sup> from Hubbell Power Systems

## <sup>🇨🇦</sup>FIRST & ONLY News Flash!

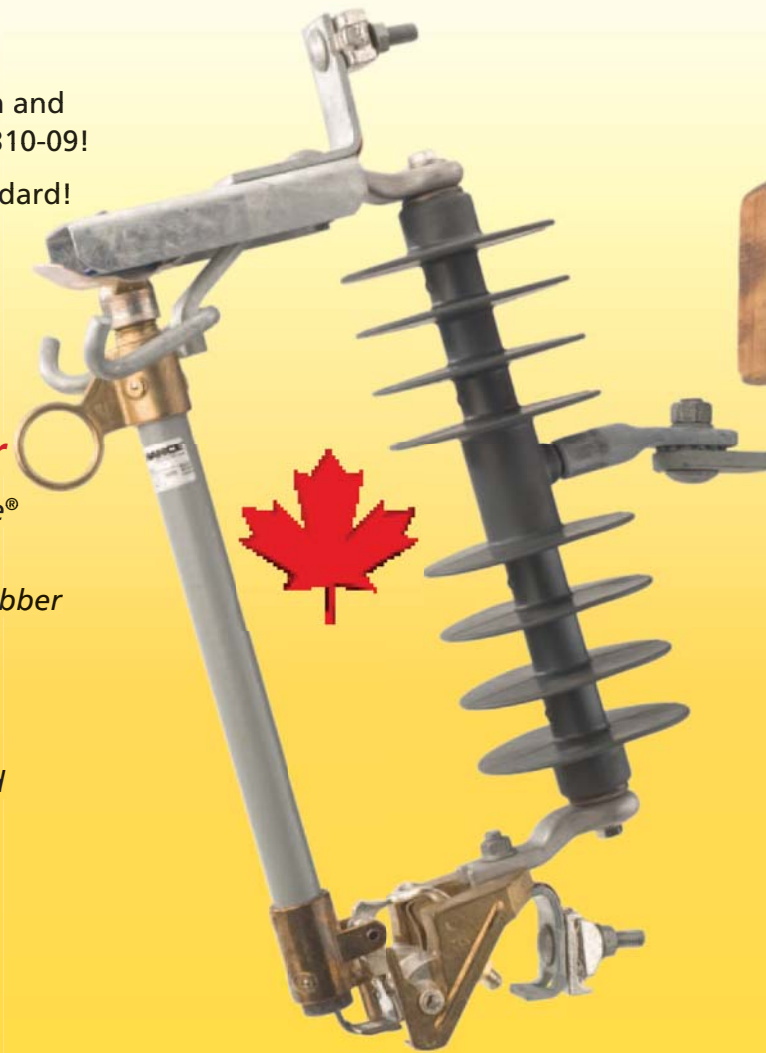

- Hubbell is the first and only brand to pass the Design and Type Test requirements of Canadian Standard CSA C310-09!
- This is the World's first and only polymer cutout standard!

## FUTURE Forecast

- Expect the development of a similar U.S. standard.

## FUNCTION-DRIVEN reasons why Hubbell polymer cutouts are superior

- Design-technology combines over 50 years of Chance<sup>®</sup> brand cutouts and 30 years of Ohio Brass<sup>®</sup> insulators.
- Employ time-proven ESP hydrophobic silicon-alloy rubber with tracking-resistant toughness.
- Light in weight, easy to handle and install.
- Superior mechanical and electrical performance due to hardware crimping technology and chemical bond interface to polymer weathershed.

For more details on Hubbell Polymer Cutouts, contact your local Hubbell Power Systems representative or go to <http://www.hubbellpowersystems.com/catalogs/switching/> for the distribution switching catalog sections on our web site.
