### SALE / REPAIRS / MAINTENANCE/ CERTIFICATION

#### Important News:

With more than 25 years of experience in the medium and high voltage field, PTS ÉLECTRIQUE LTÉE is always in the forefront of new products.

With increasing requests for the supply of personal protective equipment such as insulating gloves, voltage detectors, insulating hand held sticks and portable grounding sets, PTS ELECTRIQUE LTEE are proud to announce the establishment of its new department of specialized safety equipment where we produce grounding sets.

Long delivery periods are a thing of the past. Our grounding sets are assembled in house in accordance with ASTM standards (American Society of Testing and Materials). This product will ensure a maximum level of protection for users. The delivery period is normally a reasonable 2 weeks but can be accelerated to within 36 hours.

Selecting a ground set to meet your requirements will never be easier.

PTS, a company in full expansion.

## PORTABLE GROUNDING DEVICE
